56% MEAL for high protein livestock feed

On average, Canadian producers harvest 8M hectares of canola land each year.

Canadian-grown canola contributes over $26B to the Canadian economy each year.

Canada exports approximately 90% of its canola as seed, oil, or meal to over 50 markets around the world.

Canadian plant scientists developed canola in the 1960s.

Canada is the #1 canola-producing and exporting country in the world!

We grow a lot more than you may think
